Smith George H.

Dios Cristiano Imposibilidad Logica:

Ateísmo contra Dios Smith George H.,2025-03-04 En este tratado clásico sobre el ateísmo George H Smith se propone demoler lo que considera el más extendido y destructivo de todos los mitos ideados por el ser humano el concepto de un ser supremo Con una erudición meticulosa y argumentos rigurosos Smith examina disecciona y refuta las innumerables pruebas ofrecidas por los teólogos profesionales y sofisticados así como por el laico religioso medio Explora los estragos históricos y psicológicos causados por la religión en general y concluye que la creencia religiosa no puede tener ningún lugar en la vida del hombre moderno y racional No es mi propósito convertir a la gente al ateísmo sino demostrar que la creencia en Dios es irracional hasta el punto de ser absurda Si una persona desea seguir creyendo en un dios es su prerrogativa pero ya no puede excusar su creencia en nombre de la razón y la necesidad moral

La pregunta por Dios Juan Antonio Estrada Díaz,2013-12-02 La pregunta por Dios surge desde los inicios de la filosofía tanto en relación con el universo como con el hombre Es una pregunta permanente y última de la que surgen la teología natural y las pruebas tradicionales de la cosmoteología y de la antropoteología El autor analiza el significado y función de esa cuestión en los grandes sistemas filosóficos comenzando por los griegos y analizando la fusión de la teología natural y la teología judaica y cristiana así como las tensiones resultantes de la helenización del cristianismo y la cristianización de la filosofía A partir de ahí se analiza la pregunta por Dios en el marco de la filosofía moderna se estudia la crítica ilustrada a la religión el significado del ateísmo y el agnosticismo y las diversas interpretaciones del hecho religioso en la época contemporánea La reflexión final constata el fracaso de la teodicea y de la demostración de la existencia de Dios a partir de las pruebas tradicionales De ahí la pluralidad de perspectivas que se abren al preguntarse por Dios desde una perspectiva metafísica religiosa y nihilista Se trata de una pregunta última para la que sólo hay respuestas penúltimas desde la que hay que plantearse la racionalidad de la fe y de las creencias en confrontación con una razón crítica reflexiva y argumentativa Conjugación de la no demostrabilidad de la existencia de Dios con la racionalidad de la fe es uno de los intentos de este estudio que se mueve en el ámbito de la teología filosófica racional y también de la teología fundamental cristiana Juan Antonio Estrada Díaz es jesuita Estudió filosofía en la Universidad Pontificia de Comillas en Madrid y posteriormente hizo el doctorado en la Universidad de Granada de la que es actualmente Catedrático de Filosofía de la religión También cursó teología en Innsbruck Munich y la Universidad Gregoriana en la que se doctoró en teología Ha sido durante muchos años profesor de la Facultad de Teología de Granada y profesor invitado en Facultades e Institutos de teología y Filosofía de Lima Asunción Managua México y San Salvador UCA Sus líneas de investigación y docencia abarcan las corrientes contemporáneas de la filosofía sobre todo la Escuela de Frankfurt sobre la que ha impartido muchos cursos y ha publicado diversos trabajos y el tema filosófico teodicea y teología natural que constituye el núcleo principal de su trabajo

Dios - La ciencia - Las pruebas Michel-Yves Bolloré, Olivier Bonnassies,2023-10-04 En este libro se revelan tras tres años de trabajo en colaboración con una veintena de científicos y especialistas de alto nivel las pruebas modernas de la existencia de Dios Durante cerca de cuatro siglos de Copérnico a Freud pasando por Galileo y Darwin los descubrimientos científicos se fueron acumulando de manera espectacular dando a entender que era posible explicar el Universo sin la necesidad de recurrir a un Dios creador Fue así como a principios del siglo xx se asistió al triunfo intelectual del materialismo De manera tan imprevista como sorprendente el pendulo de la ciencia se puso en movimiento en sentido inverso con una fuerza inslita Los descubrimientos de la relatividad de la mecánica cuántica de la expansión del Universo y de la complejidad de la vida fueron llegando uno tras otro Estos nuevos conocimientos lograron dinamitar las certezas ancladas en el imaginario colectivo del siglo xx hasta tal punto que hoy puede decirse que el materialismo que nunca fue más que una creencia como otra cualquiera está en vías de convertirse en una creencia irracional Con un lenguaje accesible a todos los autores de este libro relatan de manera apasionante la historia de estos avances científicos y ofrecen un panorama riguroso de las nuevas pruebas de la existencia de Dios A principios del siglo xx creer en un Dios creador parecía oponerse a la ciencia No ser hoy todo lo contrario

¿Dios existe o no? web what is a tensor let V be a finite dimensional vector space 1 it could be $\mathbb{R}^n$ it could be the tangent space to a manifold at a point or it could just be an abstract vector space a k tensor is a map $T: V \times \dots \times V \rightarrow \mathbb{R}$ where there are k factors of V that is linear in each factor 2 that is for $x \in V$ $\langle x, v \rangle = \langle x, v \rangle$
